

TEAR FREE Inverting Head - Shanklin® FloWrappers

Sealed Air's Shrink Packaging business is pleased to announce that the **TEAR FREE Film Inverting Head** is now standard on all Triumph, F-1, F-5A, HS-1, HS-3 and OMNI wrappers.

- **Reduce Down Time** — featuring a 45° film support on the tip of the inverting head, the TEAR FREE Inverting Head virtually eliminates film tearing.
- **Helps Save Money** — perfect for machining thin films like Cryovac® LD-935 and Cryovac® CT-301!
- **No more Teflon Tape, No more Moleskin!**
- **Simplifies Set Up** — forgiving design makes changeovers faster.
- **Reduces film tension** — allows film to form box type edge for less bag on folded edge of package.
- **Smooth Edge** — Allows pin perforator holes to transfer over edge of inverting head without tearing.
