

Shrink Packaging Systems' Solutions

**One Piece Blade
For Shanklin®
A-Series
Wrappers**

Sealed Air's Shrink Packaging business is pleased to announce that the one piece blade for our Shanklin® A-Series line of Automatic L-Bar Sealers is now standard on all A26A, A26ADA, A27A and A27ADA wrappers.

- **Improved Package Appearance** – featuring a 90-degree bend in the blade, the one-piece design improves seal quality on the bag eliminating the chance of holes in the package.
- **Maximizes Productivity** – by eliminating the chance of a loss of film cutting where the seal blades meet with two-piece blade designs, your operators enjoy trouble free uptime.
- **Cost Effective** – The purchase of a replacement one-piece blade costs less than the purchase of a Front and Cross seal Blade Set purchased together!
