

 **Sealed Air**

Shrink Packaging Systems' Solutions

**Short Product
Transfer Roller
for Tunnel
Infeeds**

Sealed Air's Shrink Packaging business is pleased to announce that the Short Product Transfer Roller for the Shanklin T-71 is now standard.

- **Significantly Improves Product Transfer** – This roller design improves the transfer process from the wrapper to the tunnel, improving the shrink-wrapping process.
- **Proven Design** – After having been field tested for over 12 months in continuous use, the Short Product Transfer Roller has operated trouble free without any failures.
- **Cost Effective** – The transfer roller is now provided at no extra cost on the T-71.
- **Coming Soon** – The Short Product Transfer Roller will be included on our full line of tunnels, beginning with the addition of the T-6H and T-7H tunnels.

Available as an upgrade kit for late model T-71's

Please contact your local authorized Shanklin Parts Distributor for pricing and availability or contact our Shanklin® parts department at 1-866-997-7273.
